

## Remote-controlled outdoor lighting

This summer you can control all sorts of outdoor lighting – at the patio or pool, along walkways or in plantings – with just a touch. Remote-controlled power outlets from Cableorganizer.com feature a transmitter, powered by a 12-volt battery, that works up to 40 feet. You don't even have to go outside if the weather is bad. Also ideal for security lights in your shed or garage. Available with or without built-in timer. Works in any standard outlet, and a splash guard protects the plug from rain. And when cold weather arrives, you can use the remote-controlled outlet for holiday decorations. Price: \$11.99 with timer; \$10.50 without timer. To order: [cableorganizer.com/bestlink/remote-controlled-outlet.htm](http://cableorganizer.com/bestlink/remote-controlled-outlet.htm). — ALLEN NORWOOD
