CableOrganizer.com's Inventory of Cable and Wire Management Solutions Exceeds 17,000 SKUs

Company Offers Simple Workplace Safety Solutions

SEPTEMBER 4, 2008, FORT LAUDERDALE, FL – Beyond the obvious aesthetic benefit of getting electric cables and wires under control, doing so is an imperative to make a work area safe for all who enter or pass. This according to industry leading eTailer CableOrganizer.com (<http://CableOrganizer.com>), who today announced its inventory of cable, wire and equipment management solutions for use in industry and at home now exceeds 17,000 SKUs.

“Equipment cables and wires can be a menace – and an expensive workman’s comp liability,” said Paul Holstein, COO of CableOrganizer.com. “In order to avoid any lawsuits against you or your business, it’s imperative to keep a business site up to safety standards and follow all safety precautions in the placement and management of workplace or job site cables and wires, and also make sure all cables and wires are working properly.”

“Poised and ready to trip all who pass, office cables and wires are far more than an unsightly nuisance,” urges Holstein. “Slips, trips and falls constitute the majority of general industry accidents. In the U.S., they cause 15 percent of all accidental, job-related deaths and are second only to motor vehicles as a cause of fatalities, according to the U.S. Occupational Safety and Health Administration (OSHA).”

To avoid a litany of work space perils, CableOrganizer.com offers these simple cable and wire management solutions:

- **Interport Power Data Center:** Made of molded plastic that is available in several finishes to match your table or décor, the unique design of this power port allows cables to remain connected while the unit is closed to hide plugs.
<http://cableorganizer.com/powerdata-centers/interport.html>
- **Wiremate:** Organize an unruly tangle of phone lines, power cords, and cables and then hide them away from view. The WireMate base has brackets and posts to wrap cables around and a molded cover that then snaps in place to conceal and protect vulnerable cables.
<http://cableorganizer.com/Wiremate>
- **Cord Cover Protectors:** These light duty wire cover systems are another great way to keep from tripping on loose cables and cords running across a walkway or behind your desk. Cord protectors cover, hide, and protect cords and cables while keeping floors clear and safe. They also lie flat, and stay flat, and are decidedly easy to install.
<http://cableorganizer.com/cord-covers>

- **Cable Guard Dropovers:** Made of quality urethane, they are very durable and an indispensable companion to any smooth floor surface. These light duty dropovers are perfect to supply temporary housing for cords and cables in offices with computer, phone and light electrical cables, schools, computer labs, warehouses, malls, retail stores, etc . where there is pedestrian traffic.

- **Floor Covers, Surface Raceways and Rubber Ducts:** Wires that run across the floor to a distant outlet are among the most dangerous workplace situations, with a high risk of injuries or damaged equipment (and liabilities related thereto). Fortunately, floor covers, surface raceways and rubber ducts are a readily available and easy way to organize and protect electrical cords in medium to heavy duty applications. Some can even be painted to match the area's décor.

<http://cableorganizer.com/surface-raceways>
<http://cableorganizer.com/rubber-ducts>
- **Split Wire Loom:** For just a few dollars, computer cables can be easily shielded with split wire loom, flexible and durable polyethylene corrugated tube with a split down the side where you enter your multi-cable bundle. If you have to add another wire later on, you can easily slip it into the *split wire loom* along with the others without removing the entire bundle.
<http://cableorganizer.com/wire-loom/flame-retardant-wireloom.htm>
- **Cable-Safe™ Cable Manager:** Cables, power adapters, power strips, hubs, modems and other small devices can be readily lifted off the floor and put safely out of harm's way with cable management products such as the Cable-Safe™ Complete Cable Manager - an extremely effective and inexpensive way to loop, tie and hang "cable clutter" off the floor to reduce work space risks including snags, trips, and liquid spills.
<http://cableorganizer.com/cable-safe>
- **Braided Sleeving:** Whether you want greater protection for your wires from children or animals or have a need to protect outdoor fiber optics, RG-6 coaxial cable or Category 5E cables from wildlife or the elements, Metal Braided Sleeving, made from tin-coated copper, is both flexible and strong, also offering Electromagnetic Interference (EMI) protection.
<http://cableorganizer.com/wire-management>
- **Wiring Duct:** An effective and economical solution for managing wires and cables. Made of heat-resistant PVC, Solid Wall Wire Ducts are particularly useful where no break-outs are required or side wall access is infrequent.
<http://cableorganizer.com/wire-duct/economical-wiring-duct.html>
<http://cableorganizer.com/wire-duct/solid-wall.html>
- **Neat Patch:** enables the customer to store their excess patch cable into a neat and tidy compartment. Instead of wading-up the slack and stuffing it into a finger-duct, the end-user simply coils the excess and slides it into place.
<http://cableorganizer.com/neat-patch/>
- **Traction Floor Mats:** Excellent for high traffic and extended use areas, particularly those prone to moisture or spills. Be sure to use a floor mat with beveled edges to eliminate trip risk; those with sponge bases will enhance ergonomic safety to boot.
