

## space Help for car clutter bugs

CableOrganizer.com, a business that offers products to manage cable, wire, hardware and other home or remote office equipment, suggests these solutions to help keep your car from developing that "lived-in" look:

**Device armor.** Pelican Micro Cases are small enough to fit into a glove compartment and designed to protect cellphones, PDAs, pagers, MP3 players and other personal gadgets.

**Cableyo.** This tiny reel is ideal for extra cord length in cars where there's always a cellphone charging from the cigarette lighter or an iPod plugged into the CD player.

**Velcro One-wrap Cable Wraps.** Also ideal for the trunk or glove compartment, this product can help organize jumper cables, toys and other small objects that are cluttering up your car's storage compartments.
