

## Show&tell Safety first

The entire Army couldn't keep your toddler from trying to stick his or her fingers inside electrical outlets. In other words, you need help.

CableOrganizer.com's Child Safety Kit includes more than 100 items intended to prevent common household hazards among children ages 5 and younger.

Among other things, the kit includes: swiveling outlet covers, cabinet and drawer locks, table corner cushions for sharp edges, clear outlet covers, an extension cord with self-blocking outlets, cord winders for containing trailing wires, and releasable cable ties for wrapping cables or tying cabinet doors.

## DailyFIX

### Make it shine

To return your diamond to its full beauty, try these cleaning tips from Real Simple:

- Soak for 20 minutes in a solution of one cup warm water and 1/4 cup ammonia.

- Then gently scrub with a soft-bristle toothbrush, getting into the small areas between the diamond and the setting.

- Rinse with warm water, and lay on a tissue to dry.

If your diamonds are set in platinum, this method will also clean the setting.
